

# What if we had the ability to undo the damage we have done?

UJ's African Centre for DNA Barcoding (ACDB) are proud to announce and welcome delegates to the 7th International Barcode of Life (iBOL) Conference, from November 20 to 24, 2017. UJ will be hosting the conference – a first to be held on the African continent.

The major theme of the conference is exploring mega-diverse biotas with DNA barcodes and will focus on the use of DNA to understand diversity patterns and ecological processes in species-rich and complicated ecosystems.

Only we have the power to protect and rebuild our global ecosystems and UJ is honoured to be at the forefront of this ground-breaking collaborative conquest.
